Creates space for waste

## EcoCassette

### EcoVision creates space for waste

Efficient, socially responsible collection of waste is becoming increasingly more important. Legislation is getting tighter and locations are more difficult to reach. Carbon dioxide emissions must be reduced and logistic costs continuously increase.

That is why EcoVision has created a waste container that provides a solution to all these problems: the EcoCassette.

### The EcoCassette

To reduce the number of container emptying, EcoVision has equipped the EcoCassette with a press system. A ram compresses the waste in the container after every deposit. Thanks to the press system, the EcoCassette has a capacity of at least 15 m<sup>3</sup>. The EcoCassette is not emptied on site, but substituted for an empty, washed and checked one. Thus, customers have the guarantee that the installation is always clean and works perfectly with the additional bonus of no mess, odor and sound pollution at site!

**Features:**

- Volume 3 cubic meters;
- Capacity more than 15 cubic meters of waste;
- A proven concept for more than 25 years!;
- Each change a clean and checked container;
- Saving in transportation costs;
- Several types of waste can be collected;
- User friendly and reliable;
- Minimal noise;
- State of the art software possibilities;
- Complete transparency in waste disposal.

**Location**

In theory, the EcoCassette can be placed anywhere, free-standing in the open air (lock option is mandatory in public places) or underneath office buildings in a parking garage.

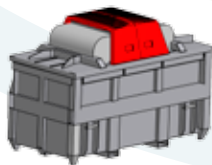

**Transportation**

For locations inaccessible to trucks, EcoVision has developed several small collection vehicles; like the EcoTransponder, the EcoPuller and the EcoMover. The EcoTransponder can maneuver easily through narrow streets with one cassette and enter parking garages with a minimum entrance height of 1m95. The EcoPuller is small enough to fit in tight spaces but still capable of transporting the EcoCassette. The EcoMover is designed to additionally maneuver the EcoCassette accurately.

So, choosing for the EcoCassette not only means greater efficiency, reduction of transportation costs and always clean containers but also provides future certainty. Certainty that your waste can always be collected and processed free of problems and at the lowest possible cost.
